[US02] AS a librarian, I WANT TO fill out the book insertion form, SO THAT I can register the book in the system

 Attach  Add a child issue  Link issue   Add Checklist 

Description

- The following fields are required:
 - book title
 - book author
 - book publisher
 - book publication year
 - book genre;
- The insertion must occur when all the two conditions below are satisfied:
 - The required fields are informed;
 - There is NOT a book with the same book title, book author, book publisher, book publication year and book genre in the database
- Otherwise, the insertion must NOT occur

Linked issues

 PS-2 Insert book   TO DO ▾

Checklist

 3 / 12    

Add ToDo item or header text here...

Definition of Done

- ☐ Tested against acceptance criteria
- ☐ Ok-ed by UX designer
- ☐ Ok-ed by Product Owner
- ☐ QA performed
[Show description](#) >
- ☐ Documentation & release notes updated
- ☐ Developed in Python

Definition of Ready

- ☒ The epic is linked correctly
- ☒ The story points were estimated
- ☒ The description was detailed and the acceptance criteria were defined

Acceptance Criteria

- ☐ GIVEN THAT I am on the book insertion form, WHEN I inform the book title, the book author, the book publisher, the book publication year and the book genre and I click on the "insert book" button and no book with the same field values is already registered in the database, THEN the book is inserted successfully
- ☐ GIVEN THAT I am on the book insertion form, WHEN I do not inform some required field, THEN the insertion does not occur
- ☐ GIVEN THAT I am on the book insertion form, WHEN I inform the field values and these values match a book already registered in the database, THEN the insertion DOES NOT occur

[US04] AS a librarian, I WANT TO fill out the book update form, SO THAT I can update the book in the system

 Attach

 Add a child issue

 Link issue

 Add Checklist

Description

1. The user must see a window containing the book data in write mode and a "save changes" button
2. The following book fields must be shown:

a. Book title

b. Book author

c. Book publisher

d. Book publication year

e. Book genre
3. After changing the desired values, the user must click the "save changes" button, in order to update the book data
4. The update must occur when the two conditions below are satisfied:

◦ The fields of the item 2 are informed;

◦ There is NOT any other register with the same book title, book author, book publisher, book publication year and book genre in the database
5. Otherwise, the update must NOT occur

[US15] As a librarian, I WANT TO search for a book SO THAT I can get more information about some book

 Attach

 Add a child issue

 Link issue

 Add Checklist

Description

1. The system must show a window in which the user can search for a book
2. The search must be done by zero, one or more than one of below fields as filters:

◦ Book title

◦ Book author

◦ Book publisher

◦ Book publication year

◦ Book genre
3. When the user clicks the "search" button, the system must show all the books that satisfy the fields passed as filter. If no value is informed, the system must return all the books
4. The search result must be a table with the following characteristics:

◦ Pagination:

◦ Each row cell must refer to a book registered in the database, containing the fields listed in the item 2
